

Pavinee Suthamjaem

SUMMARY

As an early graduate in Information Systems and Network engineering, I have developed strong foundation in software design and development. I have completed 6 projects during my studied, which has given me practical experience in working with different technologies and tools. I'm a quick learner and I'm always eager to learn new technologies and techniques to enhance my skills. I'm passionate about computer engineering and I'm looking for an opportunity to apply my skills and knowledge to contribute to a team and achieve company goals.

EXPERIENCE

Software Engineer (Internship),

June -October 2022

Lumentum International (Thailand) Ltd., Co - Pathumthani, Thailand

- Design and develop software solutions, including console and window form applications, using C#, .NET, .NET Core, and Visual Basic to enhance workflow efficiency and streamline procedures.
- Restyle the team's software website and implement new functions to improve usability by using Angular, Typescript.
- Enhance the efficiency and modernity of the existing software by means of revising and improving its design and functionality.
- Assisting staff and users from other teams in accessing the database, generating new records, modifying or removing existing data, retrieving test data as per user requirements, and resolving any issues that may arise during these processes.
